FOR BARGAIN LOTS SEE PAGES 10 AND 20.

FREE FREIGHT AND EXPRESS.

Terms, Conditions and Directions.

Terms.—Invariably cash, unless otherwise agreed upon. All orders to be sent C. O. D. must be accompanied with one-fourth the amount in cash. Remit by Money Order, Registered Letter or Bank Draft.

It is important that you order early. For the benefit of customers who wish to order early, but who do not care to spare all of the money when the order is sent, we will accept such early orders if one-third of the amount is sent with order. We will reserve the stock for you. Balance to be sent when you order the stock shipped.

DIRECTIONS FOR ORDERING.—Write name and address plainly. Always state distinctly the sizes and grades of stock ordered as per the grades given in this List. When named varieties cannot be furnished, we reserve the right to substitute such varieties as will fill the season as near as possible, unless prohibited in the order. Persons unacquainted with the different varieties will generally get a much better selection by leaving the assortment to us. **Be sure to give directions how to ship, whether by Express or Freight.** When these conditions are not complied with, we will use our own judgment and ship the way we think best. Keep a correct copy of the order, so that when the stock arrives you will know exactly whether you get what you have ordered. If we make mistakes they are accidental and we wish to right them, but oftentimes people make complaint simply because they do not know what they have ordered.

FREE FREIGHT, FREE EXPRESS.—On all orders over \$15.00, accompanied by full remittance, we will **prepay** the Freight or Express Charges to your R. R. Station if East of Denver, Colorado.

THE PRICES are for the quantities named, but five, fifty and five hundred will be supplied at ten, hundred and thousand rates respectively.

PACKING.—All goods are packed free. Notwithstanding this fact, we use the utmost care and pack according to the distance and to our customers' best interest. Everything is labeled.

OUR GUARANTEE.—We use every possible means and endeavor to our utmost to keep all our varieties true to name. The fact that nurserymen, planters and fruitgrowers of the country have ordered of us year after year, is as good a guarantee as can be given by any other nursery of twenty-seven years' standing. But if any mistakes occur, we will cheerfully rectify them. **All our shipments of trees** will be accompanied by **Certificate of Inspection of Prof. J. M. Stedman, Government Entomologist.** This is a guarantee to the buyer that our stock is free from all disease. Missouri grown trees are the best. Good stock, true to name, sold direct to the planter at reasonable prices is our aim.

OUR LOCATION is the very best for producing well ripened stock with splendid roots. Our facilities for prompt shipments are first class and we have special low **Express Rates.**

Remember that we pay the Freight or Express Charges on all orders amounting to over \$15.00, and guarantee safe arrival of shipments.

NEW HAVEN NURSERIES,

(J. BAGBY & SONS CO.)

NEW HAVEN, MO.

Some Remarks on Varieties, Sizes, Etc.

We wish to say that the small size trees are strictly first-class and well rooted, and by many will be preferred to the larger size.

VARIETIES.—So many ask, "What should I plant in my locality?" that we will here name a few of the popular and profitable sorts for general planting:

APPLES.—Ben Davis, Jonathan, Mam. Black Twig, Gano, York Imperial, Rome Beauty, Wine Sap, Grimes' Golden, Maiden's Blush. This is our Commercial List. Others would add perhaps Wealthy, Ark. Black, Ingram, Mo. Pippin, Duchess Oldenburg, Etc. All of the above are good profitable sorts, both for home use and for the market.

PEACHES.—If you want to market your fruit, avoid planting too many early sorts. Family Favorite, Fitzgerald, Foster, Champion, Mixon Free, Stump, Elberta, Heath Cling, Miller Cling, Crosby, Capt. Ede, Gold Dust, Chair's Choice, Gold Medal, Salway, Crawford's Late, Bonanza, are all profitable for market. Should very early sorts be desired, Triumph, Alexander and Sneed are what you should plant. If for home use plant general assortment, including above, for a succession, be sure to include Golden Gate, Queen and Carman. The peach tree should have the shoots and branches shortened every year or two. The land should be kept in a high state of cultivation.

PEARS.—The fact is more and more apparent that Kieffer and Garber will stay in the lead for profit. Duchess, Seckel, Bartlett, Jersey, Etc., should also be in most orchards. **Gathering Pears.** In order to retain the juice and best flavor, summer pears should be gathered at least ten days before they are ripe, and autumn pears at least two weeks; winter varieties as soon as the leaves begin to drop.

CHERRIES.—Early Richmond, Dyehouse, Late Montmorency, Wragg, Eng. Morrello (sour), Gov. Wood, Elton and Sappington (sweet), do very well and are profitable. Try our new sweet variety—**MAGANN.**

PLUMS.—Wild Goose (native), Damson, Shipper's Pride, German Prune (European), Ogon, Abundance, Satsuma, Wickson, Red June, Willard and Burbank (Japanese), are all good bearers and are profitable. We consider the Abundance, Wickson and Burbank the best of the well-known Japanese sorts. Try some or all of the Japan sorts. Don't plant the MARIANNA except for SHADE TREES.

THINNING FRUIT.—When the trees are heavily laden the fruit should be thinned when about one-third grown, else the fruit will be poor and the trees injured.

WHOLE ROOT TREES.—The "Whole Root" schemes we can but compare in our mind to the working of Patent Medicine Men and Quacks. They try to scare you into buying their goods. Pear, Peach, Plum and Cherry trees ARE ALL grown on "whole roots." Our Apples are most all on so-called whole roots, grafted and planted so that the cion also roots. Don't pay extra prices for "trade marks." We give our customers the VERY BEST, and we don't ask TWO PRICES. A trial order will convince you.

NOTE.—That we offer heavy budded trees—budded above ground—on branched root stocks (whole roots). Our 1-year buds are equal to 2-year trees from grafts.

What Some of Our Customers Say.

J. G. McNAIR, St. Louis, Mo. "The car came in yesterday. The trees are good. Enclosed find checks for \$776 for credit on account." (Mr. McNair is the largest orchardist in the world. Bought about 60,000 peach and apple trees from us alone in 1893.)

J. H. CHAPMAN, Nebraska. "The 4,000 Apple from you spring 1896, have made a remarkable growth."

RUEBEN LIPP, Pawnee County, Nebraska. "Trees all starting nicely. Expect to buy again."

PILLMANN BROS., St. Louis County, Mo. "Was out and looked over our trees which we planted last spring (3,000). They are simply immense and as fine as you ever saw."

C. R. PILE, Kentucky. "Enclosed check for another lot of trees. I always advise my friends to buy from you."

EDMONDSON BROS., Perry, Iowa. "Your stock came in all right, and is all right, and satisfactory."

COL. M. B. W. HARMON, Nodaway County, Mo. "Everything in good order. Please accept my thanks for a fine lot of trees and for your prompt delivery. If Spain don't force a war on us I shall try to plant ten acres next spring."

E. VALLETT, Nauvoo, Illinois. "Was well pleased with your trees and expect to buy of you again."

JUDGE W. R. WILKINSON, Perry County, Mo. "The best trees anyone in this section ever saw."

J. L. IRWIN, Stedman, Mo. "The trees came in good order, and I think as a whole were the finest lot I ever saw. I think all will live."

A. H. KERCHEVAL, Ellsberry, Mo. "Was well pleased with stock."

ALEX STEWART, Cole County, Mo. "I don't think I will lose a tree of my spring setting. Will want 1,000 Ben Davis for fall."

M. BRAND, Chicago, Ill. "Goods sent to me at Brandsville, Mo., were very satisfactory."

D. FRANCISCO, Kansas. "Received trees in good shape and am well pleased with them."

J. W. EDWARDS, Cole County, Mo. "I am well pleased with the trees."

POLSTER BROS., Warren County, Mo. "A handsome lot of stock."

C. G. WINN, Secretary Central Illinois Horticultural Society, Pike County, Ill. "Trees to hand O. K. Everything seems to be in good shape." (Mr. Winn bought about 10,000 trees spring '97.)

A. F. COLLINS, Saline County, Mo. "The 2,000 trees bought of you spring of 1895 did splendidly. Lost forty per cent."

SHOWING PART OF BLOCK OF HALF A MILLION TREES—ONE YEAR OLDS.

APPLE TREES.

Our Apple are all grown on Missouri River upland, are well rooted, smooth, clean, and well grown in every respect. **No better trees can be found anywhere.** We offer also budded trees. They are smooth and clean with **splendid roots.**

SELECT VARIETIES.

SUMMER APPLES.—Carolina Red June. (Red June). Medium size, red; flesh white; tender, juicy, subacid; abundant bearer. Last of June.

Duchess Oldenburg. Russian. medium to large size; skin yellow, streaked with red and somewhat blushed, sometimes with a faint blue bloom; flesh juicy and good, with a red, subacid flavor. Productive; slow. August.

Early Harvest. Medium to large, roundish; bright straw color; flesh white, tender, juicy, crisp, with rich, subacid flavor. Tree moderately vigorous and productive; one of the best. First of July.

Keswick Codlin. Large, tender, juicy; excellent for cooking; productive and early in bearing. July and August.

Red Astrachan. Large, crimson, handsome; rather acid, but good and crisp; ironclad; profitable. Early.

Yellow Transparent. This valuable Apple was sent out by the Department of Agriculture, and is said to be of Russian origin. However, we find it to be a very valuable addition to our list. Fruit medium to large; nearly white; pleasant subacid; juicy.

FALL APPLES:—**Maiden's Blush.** Rather large, oblate, smooth; regular, with a fine, evenly shaded red cheek or blush on a clear, pale yellow ground; flesh white, tender sprightly, with a pleasant subacid flavor; bears large crops. August and September.

Rambo. Medium; yellowish, streaked with dull red and somewhat dotted; mild, tender and good; productive and vigorous. September to November.

Rome Beauty. Large, yellow, shaded with red; tender, juicy, subacid. November to February.

Wealthy. An apple of fine appearance and quality; an early and profuse bearer; a good market Apple of its season. Tree hardy; its chief fault is killing itself by its early and excessive bearing; in size and beauty it equals Baldwin, and is a better dessert Apple. Ripens here last of August. Winter Apple North.

WINTER APPLES:—**Arkansas Black.** Origin Bentonville, Arkansas. The tree is a beautiful upright grower, young wood, very dark. Fruit medium to large; fine flavor; beautiful dark color, almost black; flesh yellowish, slightly subacid, crisp. One of the best cooking Apples; vigorous. January to July.

Ben Davis. (New York Pippin). Fruit medium to large, roundish; skin yellowish, splashed and striped, and almost covered with red; flesh white, tender, moderately juicy, subacid; an excellent variety. Tree very hardy, a free grower, coming into bearing early, and very productive; very popular in the West and Southwest. December to March.

Clayton. Large, conical, flattened, regular; red, with darker stripes; flesh yellow, breaking, subacid; a very valuable market sort. Tree a strong grower, long-lived, good bearer. December to March.

Grimes' Golden. (Pippin). Medium to large; rich golden yellow; flesh tender, mild, subacid. Should be gathered before turning yellow and put in a cool place, and will often keep until February. For canning purposes it nearly equals the pear. Tree hardy, vigorous; an early and abundant bearer. November to January.

Huntsman's Favorite. Originated in Johnson County, Missouri. Very large; golden yellow, with bright red cheek; nearly sweet, fine flavor, very aromatic. One of the best and highest-selling market Apples; tree very healthy and moderately productive; vigorous. November to January.

Gano. Origin Howard County, Missouri. This Apple was introduced to the public in 1886, and advertised as the finest red winter Apple in the world, and we still claim it. It has surpassed that famous commercial variety, Ben Davis, in this section. Tree very hardy; has never been injured by the cold winters; bears very young, roots readily from its own stock, and can almost be grown from a cutting. Fruit bright red on yellow ground, no stripes; large, oblong, tapering to the eye; surface smooth, takes a very high polish, making it valuable as a stand fruit; minute dots; basin shallow, sometimes deep; stem medium to long; flesh white, fine-grained, tender, mild, pleasant, subacid. An early, annual and prolific bearer. December to May.

Ingram. A seedling of the old Janet. Originated near Springfield, Mo. Its habits are similar to the Janet, but the tree is a more upright grower, and the Apple is not subject to crack. These Apples sold on the Kansas City market, May 15, 1897, for \$5.50 per barrel, when fine Ben Davis brought only \$3. Size medium; roundish, inclined to conical; smooth, yellow ground, striped bright red in the sun; flesh greenish yellow, fine-grained, delicate, tender, juicy; agreeable, subacid flavor; good keeper. Tree hardy, late bloomer and very productive.

Janet. (Never Fail). Medium, roundish, ovate; greenish yellow, striped with red; crisp, rich and juicy; one of the best and longest keepers in the South and Southwest; valuable for its high quality and its late blooming; moderate grower. January to March.

Jonathan. Fruit medium, roundish; skin yellow, nearly covered with dark or lively red; fine-grained, very tender and finely flavored; moderate grower. One of the best Apples for home use or market. October to January.

Mammoth Black Twig. Supposed to be a seedling of the Wine Sap, but tree a better grower in the nursery, and fruit much larger; or, in other words, an improved Winesap. Tree a fine, upright, spreading grower. Fruit is fully one-quarter larger than Winesap, which it very much resembles in flavor and keeping qualities. We do not hesitate to recommend it as a commercial variety wherever the Winesap succeeds.

Mann. An upright grower, forming a round head; fruit medium to large, roundish oblate; skin deep yellow when fully ripe.

Missouri Pippin. Large, oblong, bright red with numerous grey dots, very handsome and of fair quality, and early and very abundant bearer, and a very profitable orchard fruit. December to March.

Salome. A northern Illinois Apple, said to be very hardy, bearing early and abundantly. Resembles the Janet in size and color; flavor, juicy and sprightly; a good keeper. January to April.

Stark. Large, roundish; skin greenish yellow, shaded and striped with light and dark red nearly over the whole surface, and thickly sprinkled with light brown dots; flesh yellowish, moderately juicy, mild subacid, good quality. December to February.

Winesap. Medium, dark red; subacid, excellent; abundant bearer; a favorite market variety in the West; vigorous. November to April.

Wolf River. An Apple peculiarly adapted to the West on account of its extreme hardiness; very large and handsome; flesh whitish, breaking, pleasant, subacid; a good bearer. October to December.

York Imperial. This Apple has been gaining in favor, and is being planted largely in the West as a commercial sort. Large, oblate; yellow, shaded with crimson; flesh firm, crisp, juicy, subacid; vigorous and prolific. December to February.

CRAB APPLES:—Hyslop, Whitney, Transcendent.

On club orders amounting to over \$20.00, ten per cent additional in stock will be allowed.

~~~~~  
**PEACH TREES.**

We are the largest growers of Peach trees in the West, and can supply in any quantity—the best **up-to-date market sorts**. Our Peach are stocky, nicely headed, smooth straight bodies, well rooted, on healthy Peach stocks, and free from any disease. Remember this is comparing prices with eastern establishments. **Freight Paid to your station**, on conditions mentioned. Prices as follows unless otherwise indicated:

|                                              | Each | 10    | 100    | 1000    |

| Medium, 3 to 4 feet, nice, well rooted ..... | 10c  | 75    | 5 00   | 45 00   |
| First Class, 4 to 5 feet .....               | 10c  | 1 00  | 7 00   | 60 00   |
| Extra select, 5 to 6 feet .....              | 15c  | 1 25  | 9 00   | 80 00   |

**SELECT VARIETIES.**

The following have been selected as the best, including many new varieties. they furnish a succession for over four months, commencing about June 20th.

**Arkansas Traveler.** Said to ripen earlier than Amsden, of which it is a seedling; fully equal in every respect.

**SETTING 20,000 PEACH BUDS PER DAY IN A FIELD OF OVER 800,000 TREES.**

**Alexander Early.** Large size, well grown specimens measuring eight inches in circumference, handsome and regular in form, with deep maroon shade, covered with the richest tint of crimson, rich and good in quality with a vinous flavor; adheres to the stone; should remain on the tree until fully ripe. First of July.

**Billyeu's Late.** Originated in Carolina County, Maryland. A very late Peach, ripening after Smock Free and Salway; fruit of large size; color white, with a beautiful blush cheek; flesh white; freestone and an excellent shipper.

**Briggs' Red May.** Medium size; very highly colored; flesh greenish white, very juicy, vinous, and of very good quality; adheres somewhat to the stone; of firm texture; tree very prolific. Ripens fully ten days later than Amsden.

**Barnard's Early.** Medium to large, cheek purplish red; flesh yellow, red at the stone; juicy, sweet and rich; one of the best yellow fleshed free stoned peaches. Last of July.

**Boley.** Large, white flesh; the best new sort we know of. Season, August 20th. 50c each.

**Bonanza.** Free, medium; flesh white, red cheek, fine quality, vigorous, productive, sure. For a really fine freestone, fifteen days later than Salway, we are at last rewarded by this true Bonanza to the peach grower. October.

**Barnes.** A fine, very late yellow cling of Indian type. Originated in Bell County, Texas, by Barnes Parker. Season, October. 50 cents each; \$1.00 for 3.

**Bell's October.** Large, rich yellow, red cheek; freestone; of finest quality. Originated by Hon. C. C. Bell, of Denton County, Texas. 50 cents each; \$1.00 for 3.

**Bokara.** An extra hardy variety; said to stand 20 degrees below zero. 20 cents each; \$1.00 for 6; \$12.00 per 100.

**Capt. Ede.** Originated on the farm of Capt. Ede, in Illinois; is a splendid yellow freestone variety. Ripens latter part of August. Very productive, hardy, profitable. 20 cents each; \$1.00 for 6; \$12.00 per 100.

**Carman.** New. Originated in Texas. Very early. 25c each; 10 for \$2.00; 100 for \$15.00.

**Champion.** Originated at Nokomis, Illinois. Fruit large, beautiful in appearance; flavor delicious, sweet, rich and juicy; skin creamy white, with red cheek; freestone. August 15th. The peculiarity of this great acquisition is its hardiness, and the crowning events in its history of its having stood a temperature of 18 degrees below zero in the winter of 1887-88, and produced an abundant crop the following season, and again in 1890 producing a full crop, when the peach crop was a universal failure.

**Chinese Cling.** Most popular Southern peach, oblong, creamy skin, with faint flashes of red. August.

**Chair's Choice.** Large, late, yellow. One of the best for home or market planting.

**Crawford's Early.** This beautiful yellow peach is highly esteemed for market purposes in the South. Fruit very large, oblong; skin yellow, with fine red cheek; flesh yellow, juicy, sweet and excellent; free. Last of July. (Would not advise planting this sort North of Central Missouri.)

**Crawford's Late.** Fruit of the largest size; skin yellow, or greenish yellow, with dull red cheek; flesh yellow; productive; one of the best; free. Last of August and September.

**Conklin.** Late, yellow, freestone; productive; profitable.

**Crosby Frost-Proof Peach.** If you want peaches every year, try some Crosby. It is of large size, rich orange yellow, splashed with red and of best quality. Mid-season. 20c each; \$1.50 for 10; \$12.00 per 100.

**Diamond.** The finest Cling in existence. Very large, hardy and productive. 25c each; \$1.00 for 5; \$15.00 per 100.

**Elberta.** A Georgia cross between Crawford and Chinese Cling, very large, well colored; all things considered the finest yellow freestone in cultivation; no one can go amiss by planting it; fruit perfectly free from rot, and one of the most successful shipping varieties. August 20th.

**Fitzgerald.** Of Crawford type. A seedling found at Oakville, Ont., where it stands the winter perfectly, and for the past four years has cropped regularly. Oakville is situated outside of the peach-growing district, and any other varieties will not succeed there. It is undoubtedly VERY HARDY, and the fruit averages larger than any variety known. Quality first-class, freestone, and we recommend it with entire satisfaction. We quote the following extract from Mr. Roland Morrill: "In 1896 the original 100 trees bore from a few samples to half bushel of as fine peaches as anybody ever saw, being fully larger than Crawford's, on same age trees, even handsomer in color, and having the smallest pit I ever saw in any peach except seedling." We offer this sort at 25 cents each; \$1.00 for 5; \$15.00 per 100.

**Family Favorite.** Free, seedling of Chinese Cling, of better color, large, clear, waxy complexion with blush, prolific, firm, valuable for shipping, canning or drying. Last of July.

**Foster.** Same season as Crawford's Early, but much more productive; yellow, with red cheek; quality best; good size.

**Gold Dust.** If you want the very best canning variety this is the peach. Large Yellow Clingstone; juicy, productive and of best quality. Season, September 15th to 20th. 20 cents each; \$1.00 for 5; \$10.00 per 100.

**Golden Gate.** Originated by Dr. Smith, of Hermann, Mo. Very productive, large beautiful yellow. Season, a week later than Elberta. 25c each; \$1.00 for 5.

**Gold Drop.** This variety has a sort of transparent golden appearance, rendering it immensely attractive in market, selling for the highest price. Good quality, a very early and profitable bearer, hardy. Originated in Michigan where it has rapidly forged to the front. One of the best market varieties. Ripens between Late Crawford and Smocks.

**Gold Medal.** Elberta shape and color, larger and about ten days later than Elberta. 25c each; \$1.00 for 5; \$15.00 per 100.

**General Lee.** An improved Chinese Cling; very valuable. August 20th.

**Globe.** An improvement on Crawford's Late; fruit large, globular, of a rich golden yellow with a red blush, flesh yellow, juicy. August.

**Henrietta.** (Levy). The most magnificent yellow cling known, largest size, mostly covered with bright crimson, hardy, productive, sure bearer; always commands fancy prices. September 25th.

**Heath Cling.** Large, oblong, creamy white, slightly tinged with red in the sun; very tender, juicy, melting; very rich and luscious. September 15th.

**Hill's Chili.** Medium size, dull yellow, tree very hardy, good bearer. Last of August.

**Horton's Rivers.** A seedling of Early Rivers of which it is a counterpart in size, color and quality, but it is a perfect freestone and follows Early Rivers in time of ripening; hardy and prolific and will undoubtedly supersede its parent for a market variety. July.

**Kalamazoo.** Mr. R. Morrill, President of the Michigan State Horticultural Society, says of this variety: "Originated in Kalamazoo, attracted attention by bearing large crops of large fruit of highest quality in a locality where the peach is considered a failure. A wonderfully strong grower, bears full loads of fruit at two years old, sets an enormous amount of fruit. My trees shed a large portion soon after bloom falls, but so far (four crops) have required some thinning. Size equals Early Crawford, more uniform, pit small, flesh thick, yellow, superb quality. Skin golden yellow with light crimson cheek; fewest culls of any variety I ever saw. Kalamazoo, Lewis and Gold Drop are our money makers, fully as reliable as a potato crop and grown as cheaply, bushel for bushel. Ripens between Early and Late Crawford." 20 cents each; \$1.00 for 6; \$12.00 per 100.

**Lewis Seedling.** Remarkably hardy and a very early and abundant producer. Tree vigorous and an annual bearer. Fruit medium to large, handsome, skin greenish white with red cheek, flesh white, juicy, pit small. Middle to latter part of July. Very profitable.

**Lemon Cling.** (Pineapple Cling). Large, oblong, having a swollen point similar to a lemon; skin yellow with red cheek; flesh yellow, firm, juicy and sweet; tree a fine grower. August.

**Mountain Rose.** Large, red; flesh white, rich, juicy, excellent; one of the best early peaches, ripening with Troth's Early, and much larger and finer than that variety; should be in every collection. July.

**Miller Cling Peach.** An extra large clingstone. Hardy, productive, and of best quality. Same season as Heath Cling, but larger and better color. We consider it the best of all clingstones. 20 cents each; \$1.50 for 10; \$12.00 per 100.

**Old Mixon Cling.** Large, with red cheek; juicy, rich and high flavored; one of the best clingstone peaches. White flesh. August 20th.

**Old Mixon Free.** Large, white flesh, with deep red cheek; rich and good; one of the best. August.

**Picquet's Late.** A Georgia variety of large size; yellow, with red cheek; flesh yellow, melting, sweet, of the highest flavor; freestone; a valuable acquisition. September.

**Queen.** A very late September variety. Originated in Howell County, Missouri. Freestone, white flesh, red cheek. 25 cents each; \$1.00 for 5; \$15.00 per 100.

**Ringgold Cling.** Much larger than Heath, every way an improvement on that popular kind. September 1st.

**Reeve's Favorite.** Fruit very large, round; skin yellow with a red cheek; flesh deep yellow, juicy, melting and excellent; tree hardy and productive; one of the best and most reliable yellow market peaches. First of August.

**Salway.** Fruit large, roundish, deep yellow, with a deep marbled brownish red cheek; flesh yellow, firm, juicy, rich and sugary; a new English variety; a late showy market sort; free. Last of September.

**Smock Free.** Fruit large, oval, skin orange yellow, mottled with red, a good market sort. September 15th.

**Success.** Prolific, sure; latest Yellow Freestone; large, excellent. Originated in Texas, and offered with confidence in its merit. 50 cents each; \$1.00 for 3.

**Sneed.** The most remarkable early peach yet introduced; it ripens a week to ten days earlier than Alexander, and belongs to an entirely different type from Alexander and Hale's Early; it is very distinct in tree and fruit, belonging to the Chinese Cling type; size medium, color white with flush on cheek. 20 cents each; \$1.00 for 6; \$12.00 per 100. Trees 4 to 6 feet.

**Stamp the World.** Very large, roundish; skin white, with a bright red cheek; flesh white, juicy and good; free. End of August.

**Susquehanna.** One of the handsomest peaches; large, yellow and red, melting, rich and good; origin, Pennsylvania; free. September.

**Thurber.** A seedling of the Chinese Cling, which it resembles in size and color. Size large to very large; skin white, with light crimson mottlings; flesh juicy, vinous and of delicate aroma; texture exceedingly fine; freestone. Ripens early in August.

**Triumph.** The earliest yellow peach known. Productive, hardy and profitable for market. Originated in Georgia.

**Wilkin's Cling.** Large, late, white, with red cheek; productive.

**Wonderful.** Originated in New Jersey; size large to very large, best specimens from crowded trees measuring 11 inches in circumference and weighing as many ounces; smooth, almost globular, very uniform in size and shape; color rich yellow; flesh yellow, high flavored, firm. Ripens in October.

**Wheatland.** Large, roundish, skin golden yellow shaded with crimson on the sunny side; flesh yellow, rather firm, juicy, sweet and of fine quality; tree vigorous. August and September.

**Yellow St. John.** Large, flesh yellow, equal in flavor to Crawford's; exceedingly valuable for an early market variety. Freestone. July.

**Remember we pay the Freight or Express Charges on an order of \$15.00 or over. Make up a club.**

# Peach Trees in Bargain Lots.

We offer the following well selected hardy varieties of Peach trees, first class, 4 to 5 feet, at the prices indicated, and will pay the Express Charges to your station. You can in no other manner get this splendid assortment of **new varieties** at such slight cost.

**Lot No. 1. For \$3.00, Express Paid by Us. (List Value, \$4.00.)**

16 Peach, 4 to 5 feet, **NEW VARIETIES.**

|              |              |                 |

| First Class trees, 3 to 4 feet..... | 20c  | 1 50   | 12 00   | 100 00   |

### OUR SELECT LIST OF VARIETIES.

**Abundance.** This is a remarkable fruit indeed. Its growth is so strong and handsome as to equal in thrift and beauty the Kieffer Pear, which it excels in early and profuse bearing. It is exceedingly hardy. Its propensity for early bearing is such that it bends the limbs with the weight of fruit until they sometimes break. We have seen even little two year old trees but 6 feet high, white with bloom and set heavily with large fine Plums. The fruit is very large, showy and beautiful amber, turning to a rich bright cherry color, with a decided white bloom, and highly perfumed. Flesh light yellow, exceedingly juicy and tender, and of a delicate sweetness impossible to describe. For canning it is also of the greatest excellence. Its season is very early, ripening in advance of the European Plums.

**Burbank.** The fruit is usually from 5 to 5½ inches in circumference, varying less in size than the other Japanese Plums; it is nearly globular; clear cherry-red, sometimes showing yellow dots, or even marbled, with a thin lilac bloom; flesh deep yellow, firm and meaty, rich and sugary, with a peculiar and very agreeable flavor; tree vigorous, with strong shoots, and large, rather broad leaves.

**Common Damson.** Well known and very productive. Season September.

**Golden Beauty.** Round, almost as large as Wild Goose; rich golden yellow; very firm; small seed, nearly free, excellent in quality, immensely productive, free from curculio, large, light, glossy green leaves, young wood, yellow when mature; endures drouth well. This plum is astonishing all who see its ropes of rich golden fruit, rivaling the apricot in quality. September.

**German Prune.** Very profitable, and will succeed wherever Common Damson can be grown. Very large. We consider it the best of the European sorts. August and September.

**Ogon.** It is large, nearly round; of the brightest golden yellow imaginary; flesh firm, sweet, rich and dry; is the most free of all plums, as there is not a particle of flesh that adheres to the stone when broken or cut open. It seldom fails to produce a large crop of fruit. The tree is vigorous and entirely hardy.

**Red June.** Rapidly taking the front rank as one of the best Japanese varieties. Prof. Bailey says: "By all odds the best Japanese Plum, ripening before Abundance." Tree upright, vigorous, hardy and productive. 40 cents each, \$1.00 for 3.

**Shropshire Damson.** A plum of fine quality, as free from the attacks of the curculio as the Common Dawson, and of the same color. The flesh is amber colored, juicy and sprightly. In market it has commanded nearly double the price of the Common Damson, and is enormously productive. Last of September.

**Satsuma. (Blood).** Large, globular, with sharp point; color, purple and red, with blue bloom, flesh firm, juicy, dark red or blood color, fine quality, pit very small, hardy and vigorous grower, is succeeding well in most sections. August.

**Shipper's Pride.** This plum originated in northwestern New York, near the shore of Lake Ontario and has never been known to freeze back a particle in the severest winters. Size large; color dark purple; flesh firm and excellent quality; vigorous. First of September.

**Willard.** One of the imported Japanese varieties, ripening a month before Abundance. When ripe is dark red, bordering on purple, a long keeper, not inclined to decay, carries to market well, tree a vigorous grower, very hardy and productive. Quality not as good as most of the Japan varieties, largely planted on account of its extreme earliness. June. 50 cents each, \$1.00 for 3.

**Wild Goose.** Large, rich, crimson, beautiful, flesh soft, rich, melting, delicious, with a full fruity flavor. Tree a strong grower, prolific. This variety is among plums what the Ben Davis is among apples—referring to the American class of plums. July.

**Wickson. New.** The latest of Mr. Burbank's introduction. The fact that he recommends it alone makes it worthy of a trial by all. A cross between Kelsey and Burbank. Mr. Burbank says of it: "The tree grows in vase form, sturdy and upright, yet as gracefully branching as could be desired, and is productive almost to a fault. The fruit is very large, obconical in shape, of rare beauty, and evenly distributed all over the tree. From the time it is half grown until a few days before ripening, the fruit is a pearly white color, but all at once soft pink shadings creep over it, and in a few days it has changed to a glowing carmine, with a heavy white bloom; the stone is small and the flesh is of fine texture, firm, sugary and delicious, and will keep two weeks or more after ripening, or can be picked when hard and white, and will color and ripen almost as well as if left on the tree. Ripens after Burbank and before Satsuma. Among the many thousand Japanese Plums which I have fruited, this one, so far, stands pre-eminent in its rare combination of good qualities." 40 cents each, \$1.00 for 3.

## CHERRY TREES.

Our Cherry are all budded on Imported French Mahaleb, and Mazzard Stock. They have fine roots and nice heads. All well rooted and will be graded full size indicated, and up. We have some nice Cherry on Mazzard stocks. Many prefer that stock. Prices unless otherwise indicated.

### OUR SELECT LIST OF VARIETIES.

**Dyehouse.** This variety partakes both of the Morello and Duke, wood and fruit; a very early and sure bearer; ripens a week before Early Richmond; of better quality but not quite so productive. May.

**English Morello.** Medium to large; blackish red, rich, acid, juicy and good. Very productive. July.

**Early Richmond.** (Kentish, Virginian or Early May). Medium size, red; melting, juicy, sprightly, acid flavor. This is one of the most valuable and popular of the acid cherries, and is unsurpassed for cooking purposes, and is exceedingly productive. First of June.

**Elton.** A splendid sweet sort, about ten days later than Gov. Wood, which it somewhat resembles.

**Gov. Wood.** One of the best cherries; very large, light red, juicy, rich and delicious. Tree healthy and a great bearer. May and June.

**Large Montmorency.** No doubt one of the finest acid cherries; tree very hardy and an immense bearer; commences to fruit while young, and is loaded annually thereafter with fine crops; fruit of good size, fine flavor, and of bright clear shining red; valuable everywhere, especially for northern latitudes; larger than Early Richmond, and fully ten days later. End of June.

**Magann Cherry.** A new hardy, sweet Cherry. Original tree in Franklin County, Missouri, supposed to be about forty years of age, and producing annually from eight to twelve bushels of cherries. Fruit large, showy, almost black when fully ripe, growing in large clusters. Tree immensely productive and never fails to bear a crop. Trees 2-years-old, 5 to 7 feet, select. 50 each; 10 for \$4.00. It will pay you to include some of these in your order for other stock.

**Sappington.** Originated near St. Louis, Missouri, where it is grown extensively for market, and is acknowledged to be of first quality. Later than Richmond; a good bearer and a vigorous grower. Sweet.

**Wragg.** Originated in Iowa. Medium to large in size, long stem, dark purple when fully ripe. A variety well adapted for the high latitude and prairie regions of the northwest. This is the very best sour variety. July.

BLUFF AND RIVER FRONT, NEW HAVEN, MISSOURI.

## STANDARD PEAR TREES.

Our Pear are especially clean, smooth and well rooted, grown on x x French Imported Stocks.

|                                        | Each | 10     | 100     | 1000     |

### SELECT VARIETIES.

**Anjou.** (Beurre d' Anjou). A large, handsome pear, buttery and melting, with sprightly vinous flavor; keeps into mid-winter. Tree a vigorous grower and good bearer. We have no hesitation in pronouncing it to be one of the most valuable pears in the catalogue. Does equally as well as a standard or a dwarf. Keeps until the winter holidays when it commands very high prices in the market.

**Bartlett.** Large size, with often a beautiful blush to the sun; buttery, very juicy and high flavored, bears early and abundantly, very popular; vigorous. August.

**Buffum.** Medium size; yellow, somewhat covered with reddish brown and russet, buttery, sweet and excellent. August and September.

**Beurre Clairgeau.** Large; yellow, shaded with orange and crimson, covered with russet dots, flesh yellow, buttery, juicy, sugary, perfumed vinous flavor. The size, early bearing, productiveness and exceeding beauty render this a valuable sort. September and October.

**Clapp's Favorite.** Large size; pale lemon yellow; flesh fine grained, juicy, melting, rich and buttery; a cross between Bartlett and Flemish Beauty; earlier than Bartlett, and resembling the Flemish Beauty in growth, having its fruit evenly distributed over the tree; of a uniform size. It is equally hardy with Flemish Beauty; a good grower and productive. In season during August and September.

**Duchess d' Angouleme.** Very large, dull greenish-yellow, streaked and spotted with russet, flesh white, buttery and very juicy, with a rich and very excellent flavor; on the quince, to which stock this variety seems well adapted, it is always fine; the large and fine appearance of this fruit makes it a general favorite. September and October.

**Early Harvest.** This variety originated on the Ohio river about 100 miles West of Cincinnati, where it is planted as a valuable market variety. The tree is very vigorous and long lived and as nearly free from blight as any other sort in cultivation. The fruit is large golden yellow with a fine red cheek, flavor poor, but it sells well in the market because of its size and color and earliness in ripening; ripens one month before the Bartlett.

**Flemish Beauty.** Large size, greenish-yellow and brown, with large spots of russet; rich and juicy, with a melting and musky flavor; an old and highly esteemed variety, a strong grower and a great bearer, hardy and desirable. This variety ranks for hardiness among Pears as the Duchess of Oldenburg among Apples. In season during September and October.

**Garber Pear.** Many inquiries reach us regarding the Garber. We consider it almost blight proof, a strong growing tree, hardy and productive. Fruit large and showy, destined to become one of the leading market sorts. Ripens early in October. Prices as above.

**Howell.** An early and profuse bearer; very hardy. Ripens in August and September

**Krull.** See New Pears.

**Kieffer.** Probably no fruit has ever had so much praise and condemnation, but the fact that large growers who planted orchards of it several years ago are still planting it largely is the best evidence of its value; while not of best quality, properly ripened it is a fair dessert fruit and one of the very best for canning and preserving. Its large size and handsome appearance will always cause it to sell readily on the market. Its freedom from blight, early bearing, wonderful productiveness, exceedingly vigorous growth and handsome appearance all indicate that it has come to stay. October and November.

**Koonce.** See New Pears.

**Louise Bonne.** Large, greenish yellow, with a bright red cheek; juicy, buttery and melting, excellent; very productive. One of the best on the Quince. September and October.

**Lincoln.** See New Pears.

**Manning's Elizabeth.** Small to medium; bears in clusters, crimson and gold color, very beautiful, melting, rich, sugary, sprightly perfumed flavor; excellent; very productive, one of the best early pears; vigorous. July.

**Seckel.** Small, skin rich yellowish brown, when fully ripe, with deep brownish red cheek; flesh very fine grained, sweet, exceedingly juicy, melting, buttery; the richest and highest flavored pear known. Tree a moderate grower. September and October.

## NEW PEARS.

**Lincoln Coreless.** A splendid large Autumn Pear. Very productive, beautiful color. Each 50 cents for 2-year trees.

**Koonce.** The best early pear in existence. Ought to be in all collections. Each 50 cents, 10 for \$4.00.

**Krull.** A long keeping winter sort. Originated in St. Charles County, Missouri. Vigorous tree. Fruit of very best quality. Have reduced the price of this new variety. Each 50 cents, 10 for \$4.00. 2-year, 4 to 6 feet trees.

**Freight or Express Charges paid to your Station if your order amounts to \$15.00 or more.**

## STRAWBERRIES.

**Soil and Cultivation.** With the great improvement of varieties that has taken place the last few years, has come a demand for the best and most prolific Strawberries, for planting in the market and home garden. The more intelligent cultivator, planting the most approved varieties, and giving them thorough culture and liberal manuring, is making money by so doing. On some soils the hill system of rows,  $2\frac{1}{2}$  to 3 feet apart, and plants 12 to 15 inches apart, and all runners kept cut off, proves profitable, while on some light sandy soils, where only the first two or three early pickings are profitable, it is found best to grow the plants in broad, matted rows, with just enough space between them for the pickers to pass along. But, on the whole, the most profitable, general plan, is to plant in rows 3 feet apart, with plants a foot to eighteen inches in a row, according to the vigor of the variety, allow each plant to make a few runners, just enough to form a narrow matted row not more than one foot wide. This gives ample room to work horse and cultivator at all seasons, provides for plenty of moisture in a dry time, and results in more and better berries than can be grown under any other system.

~~~~~

The Fertilization of Blossoms. The blossoms of most varieties are perfect or bi-sexual, except those marked (P), which are destitute of stamens, and are termed pistillate or imperfect flowering varieties, and must be planted near some perfect flowering sort or they will produce little or no fruit. Crescent, Bubach, Haverland, etc., are of this class, but are among the most productive when a few plants of such varieties as Bederwood, Michel's Early, or other perfect flowering ones, are planted in the same field near them. At least every fifth row in a field of pistillates should be planted with some perfect flowering sort, while if as many of a perfect flowering sort are to be planted, it is better to plant in alternate rows. Perfect flowering sorts are marked (S).

Mulching. For the best results, mulching with some light material is indispensable, which should be applied just as soon as the ground has become slightly frozen, and partially or entirely removed when the ground has become "settled" in the Spring.

~~~~~

### VARIETIES AND PRICES.

Soil, climate and other local conditions easily affect the Strawberry, and we have selected a few that succeed well all over the country. Those without experience will do well to consult with intelligent cultivators in their own neighborhood before ordering; but if they will state character of soil and leave the selection with us, we believe we can serve them.

The prices quoted are for young plants of the past year's growth, having an abundant of fibrous roots, with roots nicely straightened, and tied in bundles and labeled with name of variety. No old plants are sent out.

See next page for description of varieties and prices.

~~~~~

Remember we pay the Freight or Express Charges on an order of \$15.00 or over. Make up a club.

Bederwood. (S). This is one of the early berries, ripening, as it does, with the earliest. The fruit is of good size, productive and showy, holding its size through a long picking season. It has a perfect flower, fine healthy foliage and can be used to fertilize any early kind. This berry is a little soft for long shipments, but for near market it is hard to beat. \$1.00 per 100; \$5.00 per 1000.

Bubach No. 5. (P.) Is an excellent variety. Foliage strong and healthy, with a large leaf free from rust; fruit large, double, flattened at the point; holds its size well through the season, and presents a very attractive appearance in the basket. Quite productive; a very desirable market sort. 25c. per dozen; \$1.00 per 100; \$5.00 per 1000.

Crescent. (P). This is a very prolific berry, bearing profusely, even under neglect. In growth, it is very vigorous and hardy, and produces better if the vines are not allowed to mat. They should be thinned, even if the hoe has to be used. Fruit colors on all sides at once. A great cropper; early. Price, 75c. per 100; \$4.00 per 1000.

Greenville. (P). We have fruited this variety five years. This is one of the best paying berries we have ever raised. It is one of the most productive varieties in cultivation. The plant is a free grower and entirely free from rust. The berries are a little smaller than Bubach, but much more uniform. Flavor is good. Try a few hundred or thousand of this grand variety. 25c. per dozen; \$1.00 per 100; \$6.00 per 1000.

Haverland. (P). On account of the wonderful productiveness of this variety, being adapted to all soils, it is more generally planted than any other kind. It ripens with Crescent, but is larger and holds its size better. If sold same day as packed it will bring a good price. The fruit is not so firm as one would wish, but for near market it is fine. \$1.00 per 100; \$5.00 per 1000.

Gandy. (S). This is not a new berry but one whose value as a profitable market sort has been overlooked. The Gandy is to-day as profitable a berry to plant as any we have on our list. Its season is very late, and is in its prime when most other sorts are gone or so nearly so as to be very inferior. The fruit is large, handsome and uniform and makes an excellent showing on the market. While it is claimed by many to be a shy bearer, we find that it yields a fair quantity of berries the first year and improves with age until it becomes 4 or 5 years old. In our markets we find that the price always advances in the latter part of the season when most of the berries are gone. Having a few Gandys we found we were able to get a fancy price for them, often \$4.00 or \$5.00 per bushel. This makes money rapidly. **Plant Gandy and make money.** Price \$1.00 per 100; \$5.00 per 1000.

Mitchell's Early. (S). The introducers speak of it as follows:—"This is an accidental seedling, and the earliest and most profitable in cultivation; of the finest flavor; a perfect blossom; as large and firm as the Crescent, ten to twelve days earlier, and as productive. Plant the hardiest of all known, and free from rust or blight. Growing side by side with twenty other varieties, nothing approaches it in plant-growth, except Bubach No. 5." Price. \$1.00 per 100; \$4.50 per 1000.

Warfield. (P). This is about the size of the Crescent, but more firm and a better shipper. It is of much better quality than the Crescent. A glossy dark red in color. A great favorite for canning. It is a vigorous grower with bright, healthy, foliage, and wonderfully productive. This variety is a splendid shipper. If you raise berries for market be sure to include Warfield in your list. There is a great demand for these plants every season. 75c per 100; \$4.00 per 100.

We pay the freight on small orders clubbed together for shipment to one point, if the amount is \$15 or more.

NEW HAVEN NURSERIES,

NEW HAVEN, MO.

 You Order the Trees—we do the rest.

We pay the freight on small orders clubbed together for shipment to one point, if the amount is \$15 or more.

What Others Say.

WALTER L. WILSON, Pulaska, County, Mo. "Was well pleased with the 150 Elberta you sent me and shall need more next fall."

DAN'L D. HERR, Fairview Nurseries, Pa. "Your shipment of trees came to hand in good order and I was well pleased; will buy again. Enclosed check to pay."

JOSEPH OWEN, Buffalo County, Nebraska. "Trees were very fine and the best rooted I ever received. Will order earlier next spring."

HENRY PERRIGUEY, Osage County, Mo. "I have been buying all my trees from you the past ten years, and wish to say that they have given me the most perfect satisfaction in every way. You have my order to the amount of \$20.00 for fall delivery."

WILLIAM DE HAES, Dallas County, Texas, says: "I want some more trees. The 600 I received from you last spring were in good condition and every one started to grow."

N. B. WATTERS, of St. Louis, says: "The trees bought of you could not have done better. Ship me 1,000 of my Peach, and 1,000 Apple late this fall, and balance in spring of '98."

ED. EATON, Washington County, Arkansas. "Am well pleased with stock."

HON. F. W. PEHLE, Franklin County, Mo., says: "I have been a customer of yours over fifteen years, and I am now, and always have been well pleased with everything I bought from you."

R. M. BOOTHE, Jefferson County, Mo., says: "I have been much pleased with the several shipment of trees from you to me. I will state also that my neighbors speak in much praise of your nurseries."

J. P. COLLINS, Pettis County, Mo. "I feel it my duty to inform you that I have both orders, in good condition, good count and nice trees, with some nice ones gratis, and substitutions satisfactory, for all of which I thank you."

SIMON BOEGER, Bay, Mo. "I have always been very much pleased with all nursery stock bought of you."

D. D. FERGUSON, Newton County, Mo. "I am well pleased with the trees and expect to order of you again. Many thanks for the extras."

HON. R. DALTON, Ralls County, Mo., says: "The 1,000 Apple set in spring have done splendidly. I want to plant 4,000 this fall. Sold my Apple crop for \$2,500 on the trees."

THOS. B. BRUCH, Franklin County, Mo. "Enclosed check for \$110. The trees came in good shape and am well pleased with them."

J. A. FARRAND, Pike County, Ill. "Draft for \$50.57 herewith to balance. Expect to plant 25 acres more next year. Send me your list regular."

WILLIAM D'OENCH, JR., Secretary Gieseke Boot and Shoe Co., Mo. "The trees are a prime lot, and I desire to express to you our thanks for your careful and satisfactory attention to our order, and will be pleased to advise you further when again in need of any trees."

NEW HAVEN NURSERIES,

J. BAGBY & SONS CO.

LOCATION, 67 MILES WEST OF ST. LOUIS, ON
MAIN LINE MISSOURI PACIFIC RAILWAY.

New Haven, Mo.,

We enclose you herewith our Descriptive price list for Spring 1899, and shall be much pleased to have an order from you.

We pay the freight on all orders amounting to \$15.00 or more; but as a special inducement for early orders we will prepay freight or express charges on an order from you amounting to \$10.00 or more, if same is sent before February 20th.

We do not hesitate to guarantee you entire satisfaction in every respect, and safe arrival of goods at your station. You will find that we give you better value for your money than you can get at any other reliable establishment.

Awaiting your favors which shall have our careful attention, we are,

Yours Very Truly,
New Haven Nurseries.

N. B.

Part of money can be sent when you order, and you can send balance when you desire shipment made.

OFFICE AND ENTRANCE TO PACKING GROUNDS.

NOTES.

We are growers of what we sell, having over 200 acres devoted exclusively to the nursery business. Many so-called nurserymen, are simply jobbers in the trade, and cannot sell stock with the same certainty of its being true to name and free from disease.

Our nurseries are right here at New Haven, and we see no reason why they should not remain here permanently. Come and see us.

References.—Although our standing in the nursery profession is of years standing, this catalogue may come into the hands of many who have never dealt with us, and are unacquainted with our responsibility. To such we refer to

BANK OF NEW HAVEN, New Haven, Mo.

BANK OF WASHINGTON, Washington, Mo.

Or to the Commercial Agencies.

To those who wish to know more about the quality of stock we grow, we can refer to such large planters as L. A. Goodman, Westport, Mo.; I. Richard Dalton, Saverton, Mo.; Kansas Fruit Company, Atchison, Kans.; J. G. McNair, St. Louis, Mo.; G. N. Ratliff, Moberly, Mo.; C. G. Winn, Griggsville, Ill.; H. T. Mudd, St. Louis, Mo. These parties have bought and planted our trees in large quantities. Aggregate sales to above orchardists over 100,000 trees.

J. M. STEDMAN,
PROFESSOR OF ENTOMOLOGY AND
ENTOMOLOGIST OF THE EXPERIMENT STATION.

UNIVERSITY OF THE STATE OF MISSOURI.
A. and M. College.
Agricultural Experiment Station.
Department of Entomology.

Columbia, Mo., September 19, 1898.

To Whom It May Concern:

This is to certify that on the 19th day of September, 1898, I examined the Nursery Stock of the NEW HAVEN NURSERIES, (J. BAGBY & SONS CO.) grown in their nurseries at and in the vicinity of New Haven, Franklin County, Missouri, and found no indication of the presence of San Jose Scale, Peach Yellows, Rosette, or other DANGEROUS insect pests or plant diseases, that might be transferred on nursery stock from the nursery to the orchard.

J. M. STEDMAN,
Entomologist, Experiment Station, Columbia, Missouri.

✂ We have now growing in our Nurseries nearly one and one-half million Fruit Trees, by actual count, and other stock in proportion. All clean and healthy. No old over grown blocks to breed disease. Seventy-four varieties of bearing peach trees in experimental orchard.

New Haven Nurseries,

J. BAGBY & SONS CO.

New Haven, Missouri.

LOCATION—67 Miles West of St. Louis, on Main Line of Missouri Pacific Railway.
